

Jennifer H. Allen

Jennifer H. Allen, Ph.D., is an Associate Professor of Public Administration in the Mark O. Hatfield School of Government and a Senior Fellow at the Institute for Sustainable Solutions at Portland State University (PSU). Her research focuses on sustainable economic development, collaborative approaches to natural resource management, and the integration of sustainability into higher education. Jennifer served as the Director of PSU's Institute for Sustainable Solutions from 2012-2015, and has previously worked at the World Bank, Ecotrust, and the Oregon Economic and Community Development Department. She is currently an Oregon State Parks and Recreation Commissioner and a board member of the World Forestry Center and the Association for Environmental Studies and Sciences; previously Jennifer has served on the boards of the Oregon Forest Resources Institute, Shorebank Pacific, Portland Energy Conservation Inc., Illahee, the Portland Sustainability Institute, Friends of Forest Park, and the Food Alliance. Jennifer holds a B.A. in American Studies from Yale University, a Master of Environmental Management from Yale School of Forestry and Environmental Studies, and a Ph.D. in Environmental Science and Public Policy from George Mason University.

Nils D. Christoffersen

Nils D. Christoffersen is the Executive Director of Wallowa Resources, an organization he joined in 1999 as the first Field Program Manager. Wallowa Resources is a community based non-profit working to sustain working lands, and associated livelihoods, in Wallowa County. Over the past 17 years, Mr. Christoffersen has managed the development of Wallowa Resources' watershed stewardship and education programs, as well as their for-profit subsidiary investments in wood products, biomass and renewable energy. In support of the investments in wood products and biomass investments, Mr. Christoffersen has led multiple analyses of raw material supplies, supply chains, and delivered log prices.

He has a Bachelor's in Economics from Williams College (Massachusetts), and a Master's in Forestry from Oxford University (UK). His work experience includes 6 years in Eastern and Southern Africa, with an emphasis on community based natural resource management. Previously, Mr. Christoffersen served as Executive Director for the US Office of Africa Resources Trust, and Regional Program Coordinator for the IUCN's Regional Office in Southern Africa. Short-term engagements include work with the European Commission on matters related to CITES, elephants and

marine mammals, and field work in Australia (livestock), UK (forestry), Norway (forestry and fishing), and Israel (agriculture).

Nils serves on the Oregon Board of Forestry, and is the Chair of that Board's Sub-Committee on Federal Forests. He previously served on the National Commission on Science for Sustainable Forestry (2003-2008), and Chaired the Governor of Oregon's Eastside Forest Advisory Panel from 2003-2005.

Kaärsten Turner Dalby

Kaärsten Turner Dalby is Vice President of Ecological Services for The Forestland Group. Her management responsibilities include oversight of the FSC certification program, and TFG's efforts to generate increased revenues from a diversity of ecological services including sales of carbon credits and working forest conservation easements, leasing of wind-energy rights and monetization on non-timber attributes associated with forestland ownership. In addition, Ms. Turner Dalby is involved in the development and implementation of forest management plans involving TFG's operational staff and non-affiliated forestry management consultants. Prior to her current role, Ms. Turner Dalby served as Director of Forest Information Systems with management responsibility for the design and implementation of TFG's Forest Information System. Previously, Ms. Turner Dalby served as a Forest Information Analyst and started her employment with TFG as an intern in July of 1998.

Prior to her employment with TFG in 1998, Ms. Turner Dalby consulted with a Boston-based TIMO where she identified and researched a diversity of parameters for agroforestry ventures with non-industrial private landowners in New Zealand. She has worked for a number of domestic and international conservation organizations on public and private land management issues.

Ms. Turner Dalby has a B.A. from Smith College and an M.S. from the University of Montana School of Forestry, and an M.B.A. from the University of North Carolina's Kenan-Flagler School of Business. She has professional affiliations with the Society of American Foresters and the Forest Stewards Guild.

Bruce Daucsavage

Bruce Daucsavage is the President of Ochoco Lumber Company, formed in the 1920's. He was first hired as a CPA-Controller by the Shelk's 33 years ago. Today, Ochoco Lumber Company employs about 105 people, and owns a sawmill, bio-mass facility, timber lands, land development projects, and trading companies. The company also has years of experience operating in Lithuania and the Russian Far East.

Bruce is currently a member of the Federal Forest Working Group (formed to advance collaboratively active restoration of federal forest lands); Oregon Forest and Industries Council, Wood Products Association (an economic and grading services organization); Oregon Business Council (statewide organization of CEO's); a State community board member of Regence Blue Cross; and a former member of Economic Development of Central Oregon.

For the past few years, he has been working on collaboration in the Blue Mt. Region to advance bio-mass projects utilizing forest restoration products. He has been asked to help, through collaboration with the U.S. Endowment of Forestry in the construction of a torrefaction plant and has had the opportunity to publically speak about our unhealthy forest plight in front of the Administration, Senate and Congressional committees in D.C.

Anthony Davis

Anthony Davis is associate dean for research at OSU's College of Forestry. Davis joined OSU from the University of Idaho, where he served as the director of the Center for Forest Nursery and Seedling Research and as an associate professor of native plant regeneration and silviculture in the Department of Forest, Rangeland, and Fire Science.

Under Davis' guidance at Idaho, the Center for Forest Nursery and Seedling Research became a world-recognized leader in forest nursery science. Davis, who earned his doctorate at Purdue University, has conducted research to improve nursery production practices of native plants, restoration of degraded forests, and has studied the effects of environmental stresses on seedling growth and development.

While at Idaho, Davis received a number of honors. In 2015 he received the Dr. Arthur Maxwell Taylor Excellence in Diversity Award and in 2013 was named the Tom Alberg and Judith Beck Chair in Natural Resources, the first endowed chair at the institution.

In his position at OSU, which began on June 30th, Davis is responsible for the strategic development and the execution of innovative, effective, and respected research programs to help achieve the research mission of the College, Forest Research Laboratory, and the Institute for Working Forest Landscapes.

Greg Fullem

Greg Fullem is a shareholder in Schwabe, Williamson & Wyatt Real Estate group, focusing his practice on forest products and timberlands transactions, natural resources law and large scale conservation easement projects. He regularly provides counsel regarding dispositions and acquisitions of real property, leasing transactions, access agreements, financing, long term timber and fiber supply agreements, working forest conservation easements, timber harvest issues, carbon transactions and numerous day-to-day land management operational issues. He represents a broad range of clients, including timber investment management organizations, industrial and small woodlands timberland owners, lenders, land trusts and other non-profit organizations owning or managing ecology-based assets, biomass, geothermal and solar developers, forest products manufacturers and local governments.

During a two-year hiatus from Schwabe beginning in 2001, Greg served as legal counsel for the State of Koror, Republic of Palau in Micronesia. While in Palau, he drafted environmental, natural resources and other laws and regulations, and handled various real estate, marine and other natural resources matters. He also argued on the appellate level before the Supreme Court of the Republic of Palau and acted as general counsel for Koror State.

While attending law school, Greg served as President of the Willamette University College of Law Environmental Law Society. He was also the 1995 Executive Editor of the Willamette Law Review and published in both the Willamette Law Review and the Willamette Journal of International Law and Dispute Resolution. He attended Willamette University College of Law, University of Innsbruck in Austria, and Trinity College.

Victor Haley

Victor Haley is the Chair of the Timber and Forest Products Group at Sutherland and has extensive experience in a full range of timberland transactions, including representation of buyers and sellers, timberland financings, joint ventures, timber supply agreements, conservation easements and carbon sequestration projects. He recently represented a consortium of buyers in the acquisition of approximately five million acres of timberland from International Paper, which was the largest private land transaction ever. Victor also regularly represents buyers and sellers of timberlands outside of the United States, most recently in Brazil, Belize, Costa Rica, China, and Panama.

Victor speaks frequently at legal education forums on such topics as timberland acquisitions and joint ventures and title issues unique to timberlands.

Cherie Kearney

Cherie Kearney is the Forest Conservation Director for the Columbia Land Trust. She has been a conservation leader with Columbia Land Trust for 18 years helping grow the Land Trust from a small, local non-profit to become a renowned regional land trust serving 250 miles of the lower Columbia River in Oregon and Washington. Driven by her passion for natural resources and for the communities who rely on them, Cherie looks for forest conservation solutions that address both.

She is currently the president of the Washington Association of Land Trusts. Her past dedications include serving the Peace Corps in central Africa, St. Anne's Episcopal Church in Washougal and her local animal shelter. She holds a master's degree in public administration and a B.A. in psychology and religion from Linfield College.

Stephen Levesque

Stephen Levesque is the Managing Director of Operations for Campbell Global. He serves on the Investment; Price Forecast; and Environmental, Social and Governance ("ESG") Committees. He is responsible for the implementation of forest management activities consistent with client objectives. Mr. Levesque provides leadership for ESG related initiatives including carbon sequestration, third-party certification, and conservation.

He is also an active participant in several state and national trade associations. From 2013 to 2016, he served as the Director of Operations for Campbell, and prior to that was Campbell's Area Manager in Fort Bragg, California, where he gained substantial experience in log sales, long-term timber harvest planning, and Endangered Species Act consultations.

Before joining Campbell, Mr. Levesque managed a consulting firm in Northern California that offered a wide array of natural resource related services including watershed analysis, NEPA/CEQA support, environmental permitting, and stream restoration. During his tenure with the U.S. Forest Service, he provided technical support to the timber harvest program on the Tongass National Forest in Alaska.

Mark Norby

Mark Norby is a partner in the Portland, Oregon office of Stoel Rives LLP, whose practice concentrates on the forest products industry. He received an undergraduate degree in agriculture from Oregon State University, and has a J.D. from the University of Michigan. He has over 35 years' experience representing forestry industry clients. He currently serves as a director, member of the Executive Committee and Secretary of the World Forestry Center.

Jeff Nuss

Jeff Nuss is founder, President & CEO of GreenWood Resources, Inc. and its subsidiaries and is directly responsible for the leadership and strategic direction of the company and overall management of the business. GWR is a global timber investment management organization with over 150 professionals in offices and field locations in North America, Latin America, and Europe. The company currently has approximately \$1.8 billion of assets or commitments under management in a globally diversified timber portfolio. Mr. Nuss serves as Chairman of GWR's Executive Leadership Team and Investment Committees as well as Chairs the various Boards related to specific investments. He also serves on the Board of Directors of the National Alliance of Forest Owners, World Forestry Center, past President and Board member of Agri-Business Council, and past President and Board Member of Western Hardwood Association. He is a graduate of Oregon State University and holds a B.S. degree in Bio-Resources Engineering and M.S. degree in Resource Management and Policy from the Civil Engineering Department.

Daniel O'Brien

Mr. O'Brien is the Director of Sustainable Business Solutions for PricewaterhouseCoopers in Vancouver, British Columbia.

He has been managing BC's Land Based Investment Program over the past 8 years, working closely with government and industry.

He also works with some of Canada's largest utility companies, advising on energy management programs, natural gas for transportation programs, and environmental management system certification.

In his current role, he leads PwC Canada's Fund Management and Program Delivery practice, focused on building PwC's fund management and program delivery practice within Canada and Internationally, and also promoting sustainable resource management and climate change initiatives.

Prior to joining PwC, he was involved in supporting regional land use planning processes, species at risk recovery teams, and facilitating multi-stakeholder decision making processes, publishing several peer-reviewed articles on research related to climate change and conservation of species at risk.

Tiffany J. Starr

Tiffany Starr is the Senior Acquisitions Manager at Timberland Investment Resources. Tiffany helps lead Timberland Investment Resources' efforts to source investment opportunities in accordance with clients' risk and return objectives. Among other things, her responsibilities include evaluating and modeling acquisition opportunities, monitoring global transaction trends, conducting due diligence visits, managing transactional logistics and building and maintaining working relationships with prospective land sellers.

Prior to joining TIR, Tiffany spent ten years with the Hancock Timber Resource Group in various roles. In her latest assignment she served as transaction manager, which entailed overseeing strategic negotiations, developing tax-efficient purchase and holding structures and directing associated due diligence activities. During her tenure in that position, she helped the firm close more than \$6 billion in domestic and international acquisitions. Tiffany previously served the firm as a portfolio analyst. In that role she analyzed potential acquisitions, evaluated their capacity to support leverage, studied exchange risk variables, participated in client

relations initiatives and conducted ongoing risk and hold-sell analyses for several portfolios that were collectively valued at more than \$450 million. She began her career at the firm as a financial research consultant, which included designing and developing a model to analyze foreign investment risk, debt options and hedging opportunities. Tiffanie entered the timberland investment arena with Plum Creek and Weyerhaeuser, where she completed finance and forest operations internships. Her prior experience included serving as an individual gifts coordinator with The Conservation Fund and as an administrative records assistant with The Nature Conservancy.

Tiffanie earned her bachelor's degree in environmental science and policy at Duke University. She holds two master's degrees from the University of Georgia; a MFR in forest resource management and a MBA with concentrations in real estate, marketing and operations.
